Vaccine TITER testing – Vaccine IMMUNITY Testing

Titer testing is a blood test that measures the level of antibodies to determine if you have immunity to a specific disease, and it is often used in conjunction with vaccination to confirm immunity or determine if a booster is needed. The test can confirm past exposure or vaccination, helping to avoid unnecessary vaccines, and can also be used if vaccination records are lost or a past infection is suspected. **Please note: NO vaccine is administered. A venipuncture is performed to collect a blood sample.**

Most common test ordered (Not limited too):

Quantiferon-TB Gold – known as: Mycobacterium tuberculosis (TB) blood, QFT, IGRA (Interferon-Gamma Release Assay), TB class B. Results avail 3 days after the performing lab receives the specimen.

TB (skin)- known as: tuberculin skin test (TST), The patient must return in 48 to 72 hours to have results read

Varicella Zoster Immunity (IgG) – known as: Chickenpox Ab, VZV, Herpes zoster Antibody

Hepatitis B Surface Ab, QUANT- known as: HBV, HBsAb, Anti-HBs

Tetanus Antitoxoid Ab - known as: Tetanus Antibody

Diphtheria Toxoid IgG Ab – known as: DIPGS. Diphtheria Antibody

Polio

Rabies

Pertussis

SARS-CoV-2 Spike Ab, Semi-Quantitative

MMR Immunity Panel includes:

Mumps Immunity (IgG), Rubella IgG Antibody, Quantitative, Rubeola Immunity (IgG)
